

BioMediTech Institute

BioMediTech (BMT) is a joint institute of Tampere University and Tampere University of Technology. The objective of the BioMediTech institute is to promote and carry out research and develop operational preconditions in the field of life sciences and related technology. Within the framework of its strategy, the institute's objective is to evaluate and further develop potential innovations borne out of its research and appropriately protect them for the purpose of commercial utilisation. As part of the innovation development process, the objective of BioMediTech is also to prepare and oversee the optimal commercialisation of potential products.

Criteria for Joining BioMediTech for Research Groups

1. The field of the research is included in BioMediTech vision/mission
2. Preparedness for and willingness to strategic research and innovation
3. A proven track record of high quality research, acquiring funding and the continuance of funding
4. Proven space for progress (and protection) in the operational environment
5. Sufficient freedom of interest groups when it comes to potential commercialisation
6. Commitment to the operational principles of BioMediTech

BioMediTech board of directors decides on the acceptance of the applications.

Application Form (link)

Please fill in the application form, save it or print as PDF and send it as email attachment together with other attached documents to Faculty Manager Pirjo Kuhanen pirjo.kuhanen@tut.fi (Tampere University of Technology groups) or Head of Administration Jaana Salmensivu-Anttila jaana.salmensivu@uta.fi (University of Tampere groups).

Required Attachments

- Group leader's CV and list of publications
- Research plan for the next three years and a description of research with relation to BioMediTech operations (max 3 pages)
